**INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDER OF ONLINE INSTRUMENTS DWC-LLC,  
DUBAI - UNITED ARAB EMIRATES**

**Report on the Audit of the Financial Statements**

**Opinion**

We have audited the accompanying financial statements of **ONLINE INSTRUMENTS DWC-LLC ("the Company")**, which comprise the statement of financial position as at March 31, 2025, the statements of comprehensive income, cash flows and changes in equity for the year then ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as of March 31, 2025, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

**Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing ("ISA"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ("IESBA Code") together with the other ethical requirements that are relevant to our audit of the financial statements in the United Arab Emirates, and we have fulfilled our other ethical responsibilities. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**Responsibilities of Management for the Financial Statements**

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards (IFRSs) and in compliance with the provisions of the Law No.(10) of 2015 Concerning the Dubai Aviation City Corporation and its amendments or the Articles of the Company for such internal control as management determines is necessary to enable the presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The management is responsible for overseeing the Company's financial reporting process.

**INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDER OF ONLINE INSTRUMENTS DWC-LLC,  
DUBAI - UNITED ARAB EMIRATES (CONTINUED)**

**Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatement can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users based on these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Evaluate the overall presentation, structure, and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

We communicate with the management regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

From the matters communicated with the management, we determine if there are any matters that were of most significance in the audit of the financial statements for the current period and are therefore the key audit matters. Based on the information and explanation provided to us and our observation during our audit, we have determined that there are no such key audit matters to be communicated in our report.

**INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDER OF ONLINE INSTRUMENTS DWC-LLC,  
DUBAI - UNITED ARAB EMIRATES (CONTINUED)**

**Report on Other Legal and Regulatory Requirements**

As required by the provisions of Implementing Regulations of the Law No. (10) of 2015 Concerning the Dubai Aviation City Corporation and its amendments or the Articles of the Company, we report that:

- Proper books of accounts as required by law have been kept by the Company and are maintained on a regular basis so far as it appears from our examination of those books. The statement of financial position as of March 31, 2025, the statements of comprehensive income, cash flows and changes in equity dealt with by this report agree with the books of accounts. The financial statements comply with the required International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board (IASB).
- We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
- Based on the information that were given to us, nothing has come to our attention which causes us to believe that the Company has contravened during the financial year ended March 31, 2025, any of the applicable provisions of the of the Law No. (10) of 2015 Concerning the Dubai Aviation City Corporation and its amendments or the Articles of the Company, which would materially affect its activities or its financial position as of March 31, 2025.

**ONLINE INSTRUMENTS DWC - LLC  
DUBAI - UNITED ARAB EMIRATES.**

**Notes to the financial statements for the year ended March 31, 2025**

---

**1. Legal Status and Business Activity**

ONLINE INSTRUMENTS DW-LLC, ("the Company") was incorporated on July 01, 2018, and licensed to operate as a Limited liability Company in Dubai United Arab Emirates under the License # 8175 issued by the Dubai Aviation City Corporation, Government of Dubai, United Arab Emirates.

The Company is engaged in the business of audio-visual recording equipment and accessories trading, light fittings and fixtures trading, wires and cables trading.

The management and control of the Company is vested with Mr. Shivanand Mallappa Mahashetti (Indian national), the Manager of the Company.

The registered address of the Company is: PO Box no.390667, Business Centre, Dubai World Central, Dubai, United Arab Emirates.

**2. Share capital**

Authorised, issued and paid-up capital of the Company is AED 300,000 divided into 300,000 shares of AED 1 each fully paid and is 100% held by ONLINE INSTRUMENTS (INDIA) PRIVATE LIMITED as on the date of the financial position.

**3. Summary of significant accounting policies, judgements, estimates and assumptions**

**3.A Critical Accounting Judgements and key sources of estimation of uncertainty**

The preparation of financial statements in conformity with the International Financial Reporting Standards (IFRSs) requires the management to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities recognised. The judgements, estimates and associated assumptions are based on historical experience and other factors including estimation of effects of uncertain future events that are relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates (accounted on a prospective basis) are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

**Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation of uncertainty at the statement of financial position date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period are discussed below.

**i) Allowance of trade receivables**

An expected credit losses allowance for trade receivables is recognised as per IFRS 9 considering the pattern of receipts from, and the future financial outlook of, the concerned customer. In measuring the expected credit losses, the trade receivables have been assessed on a collective basis as they possess shared credit risk characteristics. They have been grouped based on the credit period and the days past due.

**3.A Critical Accounting Judgements and key sources of estimation of uncertainty (continued)**

**ii) Impairment of inventories**

Inventories are held at the lower of cost and net realisable value. When inventories become old or obsolete (by its design or model), an estimate is made of their net realisable value. For individually significant amounts this estimation is performed on an individual basis. Amounts which are not individually significant, but which are old or obsolete, are assessed collectively and a provision applied according to the inventory type and the degree of ageing or obsolescence, based on historical selling prices.

**3.B Summary of significant accounting policies**

**A summary of the significant accounting policies, which have been applied consistently and followed are set out below:**

**a) Basis of preparation**

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"), interpretations issued by the IFRS Interpretations Committee ("the Committee"), and in compliance with the applicable provisions of Federal Law.

**b) Accounting convention**

The financial statements have been prepared in accordance with historical cost convention and accrual. The fair/ net realizable value concept of measurement of assets and liabilities has also been applied wherever applicable under International Financial Reporting standards (IFRS) issued by the International Accounting Standards Board (IASB).

**c) Functional and reporting currency**

The functional and reporting currency of the Company is AED, as all major transactions are affected in that currency.

**d) Basis of measurement**

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique.

In estimating the fair value of an asset or a liability, the Company considers the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle, which is taken as 12 months.

### 3.B Summary of significant accounting policies (continued)

#### e) Changes in accounting policies and disclosures

The accounting policies are consistent with those used in the previous year and in conformity with applicable International Financial Reporting Standards (IFRS) except for the new IFRS and amendment to IFRS and IFRIC interpretations effective for accounting years beginning on or after April 1, 2024.

The Company applied for the first-time certain standards and amendments, which are applicable to the Company effective for annual periods beginning on or after 1 April 2024.

- Amendments to IFRS 16 – Lease Liability in a Sale and Leaseback
- Amendments to IAS 1 – Classification of liabilities as Current and Non-current
- Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

There has been no material impact on the financial statements of the Company upon adoption of the above new and amended standards.

#### f) Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instrument. Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and substantially all the risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

Except for those trade receivables that do not contain a significant financing component are measured at the transaction price in accordance with IFRS 15, all financial assets are initially measured at fair value adjusted for transaction costs (where applicable). Financial assets, other than those designated and effective as hedging instruments, are classified into the following categories:

- amortised cost.
- fair value through profit or loss (FVTPL); and
- fair value through other comprehensive income (FVOCI).

The above classification is determined by both.

- the Company's business model for managing the financial asset; and
- the contractual cash flow characteristics of the financial asset.

All income and expenses relating to financial assets that are recognised in profit or loss are presented within finance costs, finance income or other financial items, except for impairment of trade receivables which are presented within general and administrative expenses.

#### Financial assets at amortised cost

Financial assets are measured at amortised cost if the assets meet the following conditions (and are not designated as FVTPL):

- they are held within a business model whose objective is to hold the financial assets and collect their contractual cash flows; and

**3.B Summary of significant accounting policies (continued)**

**f) Financial instruments (continued)**

- the contractual terms of the financial assets give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, these are measured at amortised cost using the effective interest method. The Company's cash and cash equivalents, trade receivables, and other receivables (excluding prepaid expenses and advances), fall into this category of financial instruments.

**g) Related party transactions and balances**

The Company enters transactions with parties that fall within the definition of a related party as defined by IFRS. Related parties comprise companies and entities under common ownership and/or common management and control, their partners, key management personnel, subsidiaries, joint ventures, parent and associates. A related party transaction is a transfer of resources, services or obligations between a reporting entity and a related party, regardless of whether a price is charged. The Company provides/receives funds from related parties as and when required as working capital facilities.

**h) Trade receivables**

Trade receivables are stated at their nominal value, as reduced by appropriate allowances for expected credit loss. Bad debts are written off when there is no possibility of recovery. The Company makes use of a simplified approach in accounting for trade receivables and records the loss allowance as lifetime expected credit losses. These are the expected shortfalls in contractual cash flows, considering the potential for default at any point during the life of the financial instrument. In calculating the allowance, the Company uses its historical experience, external indicators, and forward-looking information to calculate the expected credit losses.

**i) Other receivables**

Other receivables mainly include prepaid expenses.

**j) Cash and cash equivalents**

Cash and cash equivalents include balances with banks.

**k) Impairment of financial assets**

IFRS 9's impairment requirements use more forward-looking information to recognise expected credit losses – the expected credit loss ("ECL") model. Instruments within the scope of the new requirements include financial assets measured at amortised cost, such as trade receivables measured under IFRS 15. Recognition of credit losses is no longer dependent on the Company first identifying a credit loss event, instead the Company considers a broader range of information when assessing credit risk and measuring expected credit losses, including past events, current conditions, and reasonable and supportable forecasts that affect the expected collectability of the future cash flows of the instrument.

In applying this forward-looking approach, a distinction is made between:

- financial instruments that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk ("Stage 1").

**3.B Summary of significant accounting policies (continued)**

**k) Impairment of financial assets (continued)**

- financial instruments that have deteriorated significantly in credit quality since initial recognition and whose credit risk is not low ("Stage 2"); and
- financial assets that have objective evidence of impairment at the reporting date ("Stage 3").

"12-month expected credit losses" are recognised for the first category while "lifetime expected credit losses" are recognised for the second category.

Measurement of the expected credit losses is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

**l) Trade payables**

Liabilities are recognised for amounts to be paid in the future for goods and services received, whether billed by the supplier or not.

**m) Provisions**

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimates.

**n) Offsetting of financial assets and liabilities**

Financial assets and liabilities are offset, and the net amount is reported in the statement of financial position, if the Company has a legally enforceable right to set off the recognised amounts, and the Company either intends to settle on a net basis or realize the asset and settle the liability simultaneously.

**o) Employee benefits**

A liability is recognised for benefits accruing to employees in respect of salaries, wages, performance incentives, medical benefits, and other short-term benefits in the period the related service is rendered, at the amount of the benefits expected to be paid in exchange for that service.

**p) The effects of foreign exchange**

Transactions in foreign currencies (currencies other than the Company's functional currency) are initially recorded at the rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in such currencies are reinstated at the rate prevailing on the date of financial position. Non-monetary items measured in terms of historical costs are not restated. Gains and losses arising are taken to the statement of comprehensive income. IFRIC 22 clarifies which exchange rate to use in transactions that involve advance consideration paid or received in foreign currency. This does not have any impact on the Company's financial statements.

### 3.B Summary of significant accounting policies (continued)

#### q) Contingent liabilities

A contingent liability is disclosed when the Company has a possible obligation as a result of past events, the existence of which will be confirmed only by the occurrence or non-occurrence, of one or more uncertain future events, not wholly within the control of the Company; or when the Company has a present legal or constructive obligation, that arises from past events, but it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation, or the amount of the obligation cannot be measured with sufficient reliability.

#### r) Revenue recognition

The Company follows a 5-step process to determine whether to recognise revenue, as follows:

- i. Identifying the contract with a customer.
- ii. Identifying the performance obligations.
- iii. Determining the transaction price.
- iv. Allocating the transaction price to the performance obligations; and
- v. Recognising revenue when performance obligation(s) are satisfied.

Revenue is recognised either at a point in time or over time when the Company satisfies performance obligations by transferring the promised goods to its customers or services.

#### Sales revenue

Revenue from sale of goods is recognized at a point in time when the goods are delivered, and performance obligations are satisfied.

#### s) Expenses

Costs of sales include purchase and all costs directly attributable to the generation of revenue. All other expenses are classified as general and administrative expenses and finance charges as appropriate.

#### t) Taxation

Corporate tax expense comprises current tax (i.e. amount of tax for the year determined in accordance with the corporate tax law) and deferred tax charge or credit (reflecting the tax effect of temporary differences between accounting income and taxable income for the year) computed in accordance with the relevant provisions of the Federal Decree-Law No.(47) of 2022 on the taxation of Corporations and Businesses (corporate tax law).

Current tax and deferred tax are recognised in the Statement of Profit and Loss, except when they relate to items that are recognised in OCI or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity, respectively.

The current tax payable is based on taxable profit for the year. The current tax is calculated using tax rates that have been enacted or substantively enacted, by the end of the reporting period.

Deferred tax is provided using the balance sheet method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

**3.B Summary of significant accounting policies (continued)**

**t) Taxation (continued)**

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are generally recognised for all deductible temporary differences to the extent it is probable that taxable profits will be available against those deductible temporary differences and can be realised.

Deferred tax assets are reviewed as at each balance sheet date and written down to the extent it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are offset when they relate to corporate taxes levied by the same taxation authority and the relevant entity intends to settle its current tax assets and liabilities on a net basis.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

**3.C New Standards and amendments issued but not yet effective.**

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of the Company's financial statements are disclosed below.

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28)	Deferred indefinitely
IFRS 18 – Presentation and Disclosure in Financial Statements	1 January 2027
IFRS 19 - Subsidiaries without Public Accountability: Disclosures	1 January 2027
Classification and Measurement of Financial Instruments - Amendments to IFRS 9 and IFRS 7	1 January 2026

The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective. The adoption of these standards, amendments and interpretations is not expected to have any material impact on the financial statements of the Company in the year of their initial application.

**Notes to the financial statements for the year ended March 31, 2025**

**15 Risk management**

**15.1 Credit risk**

Credit risk is limited to the carrying values of financial assets in the statement of financial position, and is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company was exposed to credit risk on the following balances:

	<b>2025</b>	<b>2024</b>
	<b>AED</b>	<b>AED</b>
Bank balance (note 7)	516,140	1,402,578
Trade receivables (note 5)	5,021,132	2,450,007
Due from related party (note 4.1)	2,682,686	-
	<b><u>8,219,958</u></b>	<b><u>3,852,585</u></b>

The Company seeks to limit its credit risk with respect to banks by dealing with reputable banks.

Credit risks related to receivables are managed subject to the Company's policies, procedures and controls relating to customer credit risk management. Credit limits are established for all customers based on internal rating criteria and the credit quality of customers is assessed by management. Outstanding customer receivables are regularly monitored.

Other receivables relate to transactions arising in the normal course of business with minimal credit risk.

**15.2 Foreign currency risk**

Foreign exchange risk is the risk that the value of a financial instrument will fluctuate due to the change in foreign exchange rate and adversely affect the Company.

Most of the Company transactions are carried out in AED. Exposure to currency exchange rates arise from the Company's overseas transactions, which are primarily denominated in US dollars (USD). Since the AED is pegged to USD, there is no currency risk with regard to the USD.

**15.3 Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has no significant variable interest-bearing financial assets or liabilities at the reporting date. The interest-bearing loans and borrowings as at the reporting date bear fixed interest rate.

**15.4 Liquidity risk**

Liquidity risk is the risk that the Company may not have sufficient liquid funds to meet its liabilities as they fall due. Prudent liquidity risk management requires maintaining sufficient cash and the availability of funding to meet obligations when due. The Company limits its liquidity risk by ensuring bank facilities and funds from the shareholder are available, as required.

The Company's terms of contract require amounts to be paid within 90 days of the date of invoice.

Trade payables are normally settled within 90 days of the date of purchase.

Notes to the financial statements for the year ended March 31, 2025

15 Risk management (continued)

15.4 Liquidity risk (continued)

The Company is exposed to liquidity risk regarding the following balances:

	2025	2024
	AED	AED
Trade payables (note 8)	5,277,291	295,206
Due to related party (note 4.2)	734,248	2,207,184
Other payables (note 9)	120,076	75,048
	<u>6,131,615</u>	<u>2,577,438</u>

16 Capital management

The primary objective of the Company's capital management is to ensure that it maintains healthy capital ratios in order to support its business and maximise equity value.

The Company manages its capital structure and makes adjustments to it in light of changes in business conditions. No changes were made in the objectives, policies or processes during the year. Equity comprises of share capital and retained earnings.

17 Contingent Liabilities and Capital Commitments

Except for the ongoing business obligations which are under normal course of business against which no loss is expected, there has been no other known contingent liability or capital commitment on Company's account as at the date of financial position.

18 Significant events occurring after the date of financial statements

There were no significant events occurring after the date of financial statements which will have any material effect on the working or the financial position of the Company.

19 Comparative information

Previous year's figures have been reclassified/regrouped wherever necessary to conform to the current year presentation and make them comparable.
